

PAD 46/61  
17 August 1961

MEMORANDUM TO: Operations Officer, NPIC  
FROM: Chief, CIA/PAD(NPIC)  
SUBJECT: Plotting GENETRIX Photography

1. During recent months there has been an increased utilization of GENETRIX photography, particularly for comparative purposes. It is anticipated that this utilization will continue for some time. At present the GENETRIX photography is plotted on a JN base on hard to read material. It is requested that NPIC/TISD undertake to transfer the existing JN plots to the standard WAC base. A similar transfer operation of [redacted] [redacted] photography was recently accomplished and has greatly facilitated PAD analysts' research efforts.
